

## THE REAL TRUTH:

The Santa Ynez Band of Chumash Indians would like to build a cultural museum on 6.9 acres across the street from the Chumash Casino Resort.

# A PRECIOUS JEWEL IN THE VALLEY

The rich cultural heritage of our tribe is something to celebrate and share – and we hope to do that with a cultural museum filled with tribal artifacts significant to our tribe.

In addition to our museum, we plan to build a commemorative park and a retail center. All will add significant value to the Valley by bringing in visitors to a thriving tourist region and contributing to the local economy.

In spite of all the hoopla surrounding the tribe's 6.9 acres and its development plans, one simple fact remains: the cultural museum will be an asset to the community and will allow us to share our cultural heritage with future generations.

*Sharing our rich  
cultural heritage  
with our neighbors.*
